Designed by THE METER. Printed in Italy.

Automatic in empty spaces.

Guided by hand past furniture and obstacles.

In open spaces, the CUBE3e performs an automatic scan in just a few seconds.

In furnished rooms or where there are obstacles, simply move the CUBE3e by hand to accurately capture the points you need, without using the joystick via the app.

The built-in encoder detects every angular change in real time, ensuring continuity and precision during the survey.

BUILT-IN ENCODER

MEASURE **THE ANGLES**

MANUAL MOVEMENT AS WELL

NEW **APP**

AUTOMATIC SCANNING IN JUST 20 SECONDS

Capture an environment with a single command. You can combine multiple scans into a single project and enhance the survey with markers and photographic documentation.

FURNISHED ROOMS? CUBE3e IS THE SOLUTION

Furniture, obstacles, recesses and complex shapes do not interfere with the scan. With the new manual function, you can rotate the CUBE3e directly by hand and precisely select the points to be captured.

No joystick: movement is direct, natural and immediate.

NEW APP: VIEW, MANAGE, EXPORT

View the survey directly on your smartphone or tablet, check the points you've captured, manage the rooms and add markers and photographs. Once you've finished, export and share the 2D floor plan in DXF format in real time.

CUBE_{3e}

Automatic to get there faster.
Manual to get exactly where you need to be.
